

VEGA Controls at OE 2015

VEGA level and pressure technologies for reliable, cost saving interface, level, density and pressure measurement - delivering effective process control solutions for the oil and gas sectors. The stand will be featuring: PROTRAC 'Multi Density Array' for optimal separator control, VEGAFLEX Guided Wave Radar with working interface level model and the VEGA pressure range, including the unique modular differential pressure (e-DP) system saving money on DP standard applications. Dual ATEX, SIL and Marine approvals.

Got Strong Thumbs!? Pit yourself against our CERTEC ceramic pressure transmitter cells, for a chance to win an Apple Watch or a daily gadget goody bag.

Look for VEGA and meet our experienced engineers and a world leading innovator in industrial instrumentation.
