

**Chicago Pneumatic Best in Class for your safety
Atex Tools!**

The ATEX directive consists of two EU directives describing what **equipment** (ATEX 95:94/9/EC) and **work equipment** (ATEX 137:99/92/EC) is allowed in an environment with explosive atmosphere (ATEX comes from French wording “**AT**tmosphères **Exp**losives” Since July 2003, organisations in EU (and many other regions) must follow the directives to protect employees from explosion risk in areas with an explosive atmosphere. The new **ATEX** directive (2104/34/EU) became mandatory for manufacturers and operators on 29th April 2016 and is stated in article 44 of the directive.
