

DICKIES HAVE WINTER COVERED FROM HEAD TO TOE

Dickies, the internationally renowned workwear brand, has an excellent range of workwear designed for warmth, with thermal clothing often the product of choice on those exceptionally cold days or freezing weather conditions.

Dickies products are tested in the harshest environments to ensure satisfaction and comfort and these thermals have been worn throughout cold UK winters for many years.

Dickies hooded tops, or hoodies as they are now commonly known, have become iconic with the more youthful workwear market. Full zipped or over the head designs and various printed designs are available in core workwear colours and fabrics. You can be sure that a work hood from Dickies will be perfect for either work or leisure wear.

The Dickies Kendrick sweatshirt is new for 2015 as part of an exciting range of agricultural inspired clothing. This garment has a ribbed collar and cuffs for a secure fit and features shoulder paneling, as with much of the new agriculture range. The front pocket is kangaroo styled, as with modern hooded sweats.

A Dickies fleece offers the wearer suitable warmth in cold working conditions. The Dickies Eisenhower fleece is rugged and warm. with woolly sherpa lining, knitted cuffs and hem and zipping right up to cover your neck.

Dickies coats and work jackets are manufactured to suit varying levels of cold, wet and wintery working conditions, with lightweight waterproof clothing for those days out in the rain, as well as thick, padded winter work coats to combat the cold.

Dickies have introduced an exciting new two-tone range for this year. The entire range has been designed to sit across all Dickies collections. Attention to details with features such as reflective piping, and high quality functional fabrics, make this the most exciting launch of products to date.

The new parka jacket is a key piece in the collection: key features include a removable hood, removable fur and a tail hem for extra back warmth. Double access lower pockets keep the hands warm when not working and the nylon taslon fabric makes this parka waterproof to 1000mm, durable but also light to wear. Inside the coat there is a Sherpa collar lining to keep the neck warm, along with Dickies branded tape details, which make this jacket feel and look premium.

Dickies ideal winter accessories include: beanie hats are perfect for cold working climates to keep heads warm they are fashionable, long lasting and durable. The Dickies Trapper hat offers excellent warmth in cold working conditions. The acrylic fur lining provides maximum heat retention and comfort and coverage of the ears from the side flaps. Both hats are also available in hi vis.

The Dickies Thermal gloves, ideal for working outdoors, have a Thinsulate lining which helps to keep hands warm in winter. Dickies half finger gloves are a great option for working in cold climates where precision may be required for certain tasks. The pouch that covers the top half of the fingers (tips) is removable, which will allow you to complete close and precision work when required and then simply place your pouch back over when finished to warm your hands back up.

Lastly for footwear, Dickies offers a range of boots with the Medway safety hiker, which is Thinsulate insulated and water resistant- ideal for winter. The heel is energy absorbing, easing the punishment of busy feet on rough ground. Comfortable to wear all day every day and offering ultimate winter protection.
